EXPERIENCE

Junior AI Engineer

May 2026 – Present

Stratai · Onsite, Coimbatore

- Building an AI-agent-based Marketplace Management System to automate product listings, dynamic pricing, and inventory sync across Amazon, Flipkart, and Shopify — directly improving sales velocity
- Architecting multi-agent workflows using LangChain and LangGraph for autonomous marketplace operations
- Developing LLM-powered repricing engines to maximize revenue and improve Buy Box win-rate

AI Automation Intern

Feb 2026 – Apr 2026

Stratai · Onsite, Coimbatore

- Designed and implemented LLM-powered automation workflows using n8n
- Integrated APIs including OpenAI, Telegram, and external data sources for real-time automation
- Built automated price-tracking and AI news monitoring systems with scheduled triggers
- Worked with Supabase and cloud databases to store structured workflow outputs

AI Intern

Nov 2025 – Jan 2026

Soul Creationz · Remote, Coimbatore

- Developed LLM-based AI chatbots for business and customer-support automation
- Implemented Retrieval-Augmented Generation (RAG) for document-based Q&A; systems
- Built backend APIs using FastAPI for chatbot integration and query processing
- Optimized prompts to reduce hallucination and improve contextual relevance

PROJECTS

AI-Powered Marketplace Management Agent | Python · LangChain · LangGraph · FastAPI · RAG

- Built an agentic AI system to fully manage Amazon, Flipkart, and Shopify seller accounts end-to-end
- Automated product listing generation, competitor price monitoring, and dynamic repricing using LLM agents
- Implemented RAG pipeline to handle seller queries from product catalogues and policy documents
- Designed REST APIs with FastAPI for seamless marketplace platform integrations

Smart Verified RAG-based GenAI Assistant | Python · LangChain · FAISS · FastAPI

- Developed a Retrieval-Augmented Generation (RAG) assistant for accurate document-based Q&A;
- Implemented semantic search using FAISS vector database and prompt engineering to minimize hallucinations
- Built RESTful APIs using FastAPI for document upload and querying workflows

TECHNICAL SKILLS

Agentic AI	Agentic AI Systems, Multi-Agent Orchestration, MCP Servers & Tool Integrations, LangGraph
AI / LLM	LangChain, RAG Architecture, Prompt Engineering, FAISS, Vector Databases, OpenAI APIs
Automation	n8n Workflows, Webhooks, API Integrations, LLM-powered Workflow Automation
Backend	FastAPI, Python, REST APIs, Supabase, Cloud Databases
Marketplace	Amazon Seller Central, Flipkart Seller Hub, Shopify — AI-driven listing & pricing automation

EDUCATION

Aarupadai Veedu Institute of Technology

2021 – 2025

B.E. in Artificial Intelligence and Data Science | CGPA: 8.6

Chennai, India

CERTIFICATIONS

- Anthropic – Claude Certified Architect, Foundations (In Progress)
- NPTEL – Introduction to Machine Learning and Cloud Computing
- IBM Cognitive Class – Data Analysis with Python
- ISRO – AI/ML for Geodata Analysis
- Microsoft & LinkedIn – Career Essentials in Business Analysis
